“Learning To Write Spencerian Script”

\$15.00

(80 pages; soft cover) by Michael and Debra Sull. Detailed, step-by-step instructions with hundreds of examples of both standard and alternate letter forms. The most thorough instruction manual available on American ornamental penmanship.

Cross-Drill Exercise Tablet

\$ 7.50

In learning Spencerian Script, the skill of achieving consistent letter-spacing is as important as properly writing the letters. The traditional method of practicing letter-spacing was through cross-drill exercises. This product consists of special cross-drill practice sheets designed by Michael Sull. The tablet contains 50 practice sheets with thorough instructions, and should be used (one sheet per day) for daily practice.

Spencerian Practice Set

\$15.00

The traditional method for students to learn Spencerian Script was known as the **Copybook format**, where a model line of Spencerian penmanship was printed at the top of a sheet, with blank lines underneath for the student to practice their own writing. In this new set by Michael Sull, the 29 printed sheets feature 100 model lines of penmanship encompassing the lowercase, capitals, words and sentences, and over 700 blank lines for the student's writing. In addition, ten blank practice sheets are included for the student's use, plus instructions.

Spencerian Guidesheet Practice Tablet

Specify beginner or advanced on the order form **\$7.50**

Specially-designed guidesheets for the writing of Spencerian Script. Excellent for practice work. Printed in a light blue, these guide sheets feature correct slant lines (for indication of proper letter-angle), and lines for lower-case letter heights and lengths (letter body, ascender and descender). Tablets contains 50 guidesheets. Beginner's guidesheets have a small letter height or approximately 1/8 inch. Advanced guidesheets have a small letter height of 1/16 inch.

Ames' Compendium Of Practical & Ornamental Penmanship

\$10.00

(60 pages, softcover) This is a reproduction of the 1883 edition. Ames' book was one of the most lavishly-designed volumes on penmanship ever to be published. Although it does not feature lessons or detailed instructions on the art or writing, it does contain hundreds of examples of incredibly ornate pen work.

PENMANSHIP INSTRUCTION DVDS

“Learning To Write Spencerian Script” with Michael Sull

\$30.00

(55 minutes) Michael's first DVD covers the tools and techniques necessary to learn the methods of writing this vintage form of penmanship. As the author goes through the writing of each letter twice, a completed letter is shown in the upper right corner of the view screen. (This video is a valuable learning tool as the student can observe the actual hand movements with the oblique pen while each letter is written).

“Off-Hand Flourishing Techniques For Ornamental Penmanship”

\$35.00

(106 minutes) This second DVD by Michael describes in detail both the tools and techniques used to create the beautiful art of Off-Hand Flourishing. The basic methods of such traditional designs as cartouches, scrolls, border patterns, title flourishing, quills and birds are covered. A special “Plates” section showing examples of over 60 historical masterpieces is featured at the conclusion of the instruction. This comprehensive video is a valuable visual guide to the stroke sequences and paper movement necessary to create off-hand flourishing patterns.
